TECHNICAL SKILLS

Languages: Python, Javascript, Java, C++, R, Assembly, Lisp, HTML, CSS

Technologies: Git, Github, Docker, Jira, Jest, RavenDB, Critique, Buganizer, Gemini API, Calendar API, Tasks API, Prose API

EDUCATION

University of Oklahoma

Norman, OK

BS in Computer Science – 4.00/4.00

Expected May 2027

- **Relevant Coursework:** Database Management Systems, Operating Systems, Algorithm Analysis, Software Engineering, Data Structures and Algorithms, Discrete Mathematical Structures, Applied Statistics, Calculus III (planned)

EXPERIENCE

Google Software Engineering Intern

May 2025 – Aug 2025

Google

Pittsburgh, PA

- Spearheaded the integration of Google Gemini into the Programmable Search Engine to enhance user interactions with intelligent summaries, contextual insights, and real-time relevance improvements.
- Engineered the end-to-end feature pipeline—from backend data processing to front-end delivery—leveraging JavaScript, experiment flag architecture, and internal tooling across a large-scale, production-grade codebase.
- Collaborated cross-functionally with a UX designer, partner intern, and two senior engineers to conceptualize and implement an intuitive UI/UX experience for AI-augmented search, emphasizing performance, accessibility, and scalability.

Momentum Technologies Software Development Intern

May 2024 - Aug 2024

Momentum Technologies

Remote

- Contributed to a 5-person intern team to effectively update web components to a newer front-end framework, significantly improving application relevancy and performance.
- Gained practical experience navigating an industrial-sized codebase, operating within an agile development environment, and adhering to best practices for writing clean, maintainable code.

William Kerber Scholar Teaching Assistant

Aug 2025 - Present

University of Oklahoma

Norman, OK

- Aided students in comprehending computer science course concepts effectively, while providing individualized support for coding projects and assignments

Sigma Nu Academic Director

Oct 2024 - Present

Sigma Nu Delta Epsilon Chapter

Norman, OK

- Manage new member and active member study hours, provide resources for academic excellence, and provide learning sessions for professional development for the Delta Epsilon chapter of the Sigma Nu (1909), a chapter of over 200 members.
- Increased overall member GPA by 10% by creating a new academic plan requiring study hours, personalized member academic meetings, and education on university resources.

PROJECTS

Pantry Pilot Pro | Git, Maven, Java

May 2025

- Developed "Pantry Pilot," a Java web application utilizing Maven to generate personalized grocery lists and recipe recommendations based on user preferences and on-hand ingredients.
- Implemented comprehensive unit testing with Maven, achieving over 80% code coverage to ensure high code quality and reliability for the web server application.

CanvasToTasks | Chrome Extensions, Javascript, Google APIs

Jan 2025

- Developed a JavaScript program leveraging Google's developer tools, the Google Calendar API, and the Google Tasks API to automate the conversion of Canvas homework assignments into Google Tasks.
